Professional Summary

AI/ML Data Scientist with hands-on experience building end-to-end machine learning solutions, including predictive modeling, computer vision, and generative AI applications. Proficient in Python, SQL, Scikit-learn, and cloud deployment. Strong analytical and problem-solving skills with a collaborative mindset and attention to detail.

Technical Skills

- **Programming & Data Analysis:** Python, SQL, Pandas, NumPy, Scikit-learn
- **Machine Learning & AI:** Supervised/Unsupervised Learning, Predictive Modeling, Computer Vision (YOLO), GenAI (OpenAI API), Prompt Engineering
- **Data Visualization:** Tableau, Power BI, Matplotlib, Seaborn
- **Tools & Platforms:** Streamlit, Git, Docker, PySpark, Linux

Soft Skills

Soft Skills: Problem-solving, Collaboration, Attention to Detail, Accuracy, Communication

Work Experience

Data Scientist Intern | InnoDatatics | March 2024 – November 2024

- **Improved defect detection accuracy by 5%** (89% to 94%) by tuning YOLO models and applying data augmentation, reducing inspection time by 15%
- **Built automated data pipelines using PySpark and SQL**, cutting data processing time by 30% and enabling faster reporting for stakeholders
- **Designed interactive Tableau dashboards** that visualized key metrics, helping teams identify bottlenecks and reducing decision-making time by 30%

Projects

GenAI Credit Risk Assessment System | Python, Scikit-learn, OpenAI API, Streamlit

- **Built a Random Forest model** predicting credit delinquency with 86% accuracy after cleaning and preprocessing financial data (income, credit utilization, missed payments)
- **Integrated OpenAI GPT to generate plain-English explanations** for predictions, making the model interpretable; deployed an interactive Streamlit dashboard for real-time risk assessment

Automated Syringes and Vials Counting System | Python, YOLOv8, Streamlit

- **Engineered a real-time object detection system** achieving 96% accuracy through data augmentation and preprocessing, reducing manual counting errors by 15%
- **Deployed a scalable web application** with Streamlit and Docker, enabling instant image upload and result display for inventory management

Solar Power Generation Prediction Model | Python, SVM, Scikit-learn, Tableau

- **Developed a predictive maintenance model** with 96.5% accuracy using SVM and GridSearchCV, identifying system faults before they caused downtime
- **Created interactive Tableau dashboards** to visualize fault trends, supporting proactive maintenance and reducing unplanned downtime by 20%

Education

PGDM in AI (Remote) | State University of New York (SUNY) | 2024

Scholarship recipient: NEF Appuji Award (USA) & 360DigiTMG (India)

BSc Computer Science | Kannur University | 2023

Certifications

- GenAI Powered Data Analytics Job Simulation | Tata Group | 2026
- AI & Deep Learning (TensorFlow/PyTorch) | 360DigiTMG | 2024
- Gold Certificate (Data Science & Python Fundamentals) | NASSCOM | 2024
- Data Visualization (Tableau & Power BI) | 360DigiTMG | 2023
- SQL & Python Programming | 360DigiTMG | 2023
